Barth.Q: Setting up a rotating sequence for a ball that rolls around a circle. I am trying to make a rotating sequence for a ball that rolls around a circle. I have the ball's x and y coordinates that are constants and a circle radius of 80. My problem is that my code only works for one rotation because the ball position is never reset. Here's what I have so far: package proj12; import java.awt.Dimension; import java.awt.Graphics; import java.awt.event.KeyAdapter; import java.awt.event.KeyEvent; import java.util.Timer; import java.util.TimerTask; import javax.swing.JFrame; public class BallRotate extends JFrame implements KeyAdapter { private int xpos; private int ypos; private int radius; private int rt; private Timer timer; public BallRotate() { super("Balls around the
